

PROFESSIONAL SUMMARY

Full-Stack Software Engineer (frontend-leaning) with 2.5+ years building high-quality, responsive, performant web interfaces at scale. Expertise in React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3 with strong foundations in OOP, RESTful APIs, distributed systems, and cloud deployments. Serving 800K+ users at Junglee Games.

SKILLS

Frontend	React.js, TypeScript, JavaScript (ES6+), Next.js, HTML5, CSS3, Tailwind CSS, GSAP, Redux Saga
Backend & APIs	Node.js, Nest.js, Express.js, RESTful APIs, PHP, Laravel
Architecture	LLD, Clean Architecture, Feature-Driven Architecture, RBAC, Distributed Systems, Design Patterns
AI & Tools	GitHub Copilot, Agentic AI Workflows, AWS, Git, MongoDB, SQL, Lighthouse CI, Puppeteer, Postman

WORK EXPERIENCE

SDE 2 — Full Stack Engineer

Jan 2026 – Present

Junglee Games

Gurugram, India

- Architected scalable promo code & discount system end-to-end with reusable React/TypeScript components, configurable validation, stacking logic, and NestJS/AWS backend services enabling rapid campaign experimentation.
- Integrated Worldpay payment gateway with responsive UI flows for initiation, failure handling, and reconciliation, improving transaction success rates and reducing drop-offs.
- Integrated Meta event tracking across critical funnels (registration, deposits, gameplay), enabling data-driven campaign optimization with measurable ROI improvements.
- Spearheaded frontend modernization for 800K+ user platform: migrated to feature-based modular architecture, extracted shared hooks/components/utilities, and leveraged AI-assisted code generation for large-scale refactoring.

SDE 1 — Frontend Engineer

Aug 2024 – Dec 2025

Junglee Games

Gurugram, India

- Built high-performance, accessible React UI features — Spin the Wheel, Slot Machine, Streak Challenge, Drop or Not — enhancing engagement for 800K+ users through gamified real-time interfaces.
- Developed reusable, schema-driven TypeScript component libraries with dynamic payload utilities, improving maintainability and developer productivity across multiple teams.
- Implemented RBAC (20+ permissions) with time-based UI rules using OOP patterns; optimized complex SQL queries across high-traffic distributed systems, significantly improving query execution efficiency.
- Mentored junior developers on architecture guidelines, code review standards, and reusable component design patterns.

Frontend Developer

Jan 2024 – Jul 2024

Fly Realty

India

- Built a production-grade Next.js application with PrimeReact and Redux Saga, delivering responsive interfaces with seamless async state management and cross-browser compatibility.
- Automated Lighthouse CI and Puppeteer pipelines to enforce performance and accessibility standards, significantly improving web vitals scores; integrated IAM and a JavaScript bridge for web-to-native interaction.

EDUCATION

MCA — Masters in Computer Application, Vellore Institute of Technology	2022 – 2024	CGPA: 8.89/10
BCA — Bachelors in Computer Application, Kristu Jayanti College	2019 – 2022	CGPA: 9.04/10

PROJECTS

Study Notion — Ed Tech Platform: Full-stack platform (React.js, Node.js, Express.js, Tailwind CSS, MongoDB) with reusable UI, RESTful APIs, OOP-driven backend, and scalable cloud deployment enabling global instructor-learner interactions.

Shoppingooo — E-Commerce Platform: End-to-end e-commerce app (React.js, Node.js, Express, MongoDB) with responsive UI, distributed REST APIs, Stripe payment integration, and Cloudinary media management; validated via Postman.

ACHIEVEMENTS

- Top Rookie & Spot Awards** — Recognized for outstanding performance within the first 6 months at Junglee Games.
- IBM Hackathon 2020** — Runner-up; demonstrated strong problem-solving and rapid prototyping under pressure.
- Competitive Programming** — Solved 800+ problems on LeetCode and GeeksForGeeks; strong in DSA and OOP.
